

MDD - 4" & 6" Patient Room Downlights

Crafted with Care to Keep Patient Rooms Cleaner.

Certolux's new, sealed MDD downlights are crafted with care to provide a streamlined, hospitality-like appearance along with a clean, comfortable environment for patient rooms. The glare-free, ambient illumination provided is attractive and comfortable, while the inclusion of healthcare-critical certifications prevents contaminants from endangering patient health.

These specification-grade downlights are expressly designed for the medical environment and include both NSF2 and IP64 certifications, an ISO3 cleanroom rating, and an antimicrobial finish to reduce harmful pathogens. They complement the popular Certolux MD series patient room troffers, and round out our lighting offerings for dedicated healthcare spaces.

Elevate your patient rooms with MDD downlights and see how safety, cleanliness, and elegance combine to create a brighter, healthier patient room.
