

MSD - 4" & 6" Surgical Suite Downlights

Purpose-Built Lighting for Surgical Suite Safety.

Certolux's new MSD luminaires are sealed, specification-grade surgical downlights, carefully engineered to safeguard patients while providing superior illumination for procedures. These unique fixtures feature an option for 97+ CRI, which aids in the accurate evaluation of skin and tissue appearance during surgery or examinations.

MSD downlights are certified NSF2 and IP65, and carry an ISO3 cleanroom rating. The addition of MIL-STD-461G certification means there is no risk of EMI interfering with sensitive surgical equipment. Certolux MSD downlights are a perfect match for the industry-leading MSU surgical troffers and are part of creating a safer space for clinical procedures and improving patient outcomes.

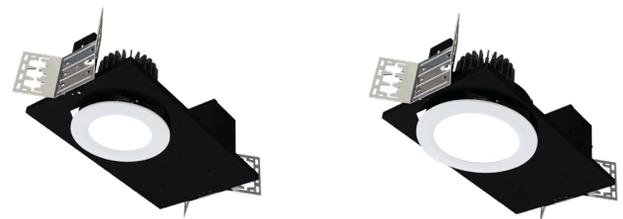

Explore Certolux's full line of medical luminaires and see how our commitment to critical healthcare spaces can protect patients and benefit surgical teams.
