

PRE-ASSEMBLED LUMINAIRES

REDUCE WITH US!

Reduced Onsite Assembly + Less Waste
= More Efficient Jobsite

Looking for a way to reduce onsite assembly costs and disposal costs? Let us show you ways to minimize handling of unnecessary packaging, down time, disposal of waste and increase the ease of installation with our pre-assembled luminaires.

Increasing Jobsite Efficiencies

We understand that time is money, especially in today's construction environments. To help save you time, money and make the installation process easier, each Viscor luminaire comes pre-assembled with power cord and suspension kits.

Our pre-assembled products come bulk packaged. This minimizes handling and decreased disposal costs, therefore contributing to your sustainability efforts. Our fixtures are packed openly per layer, supported and separated with corrugated inserts eliminating the need for individual product packaging. This system allows for easier handling and a quicker installation process.

[See the diagram example. >>>](#)

Benefits of Pre-Assembled luminaires for the Contractor:

- Reduced onsite assembly and installation costs
(Product pre-assembled)
- Less disposal costs (No individual product packaging)
- Ease of installation and less down time (Minimal handling)

How it Works?

Bulk packaging decreases the quantity of waste a jobsite can accrue, lessening the environmental impact. We offer bulk packaging for projects and consolidating shipments to reduce Greenhouse Gas Emissions.

Product is layered and supported with corrugate inserts between each layer of fixtures.

Products are pre-assembled with power cord and suspension kits.

Skid is finally shrink wrapped and tagged for a safe delivery.
