

CRUo-Plenum Access

Illuminate Cleanrooms with Precision

The CRUo-Plenum Access Luminaire is purpose-built for cleanrooms that require access to plenum space above the ceiling. Its overlapping door seals seamlessly to the ceiling and housing, ensuring airtight containment. The fixture flange is completely covered by the overlapping door, providing a sleek and unobtrusive appearance.

Certified IP65 and ready for ISO Class 3-8 cleanrooms, the CRUo series meets the highest standards of cleanliness and reliability. High-efficiency LED technology delivers uniform lighting across the cleanroom, minimizing shadows and enhancing visibility.

Highlights:

- Easy access
- Less cleanup - back in service quickly
- Located near where you need to work
- Lower cost than sealed access panels
- No added installation labor

Features:

- Shallow design, 4" deep with emergency
- Triple gasketed cleanroom construction
- Smooth lens for easy cleaning
- Room side access to all electrical components

Available sizes: 2x2 | 2x4

Featured Options:

- Polished Stainless Steel Door options
- Up to 24,000 lumens
