

MBH1-Plenum Access

Prioritizing safety, durability, and functionality in Behavioral Healthcare spaces

The MBH1-Plenum Access Luminaire is purpose-built for behavioral healthcare applications that require access to plenum space above the ceiling. It is specifically designed to be ligature resistant, minimizing the risk of self-harm or tampering. It comes with tamper-resistant hardware to enhance safety and durable polycarbonate lensing.

Designed to provide comfortable ambient lighting capable of fixed white, simple tunable white or BIOS™ dynamic or static circadian lighting. An optional amber night light can facilitate bed-check without disturbing the patient.

Highlights:

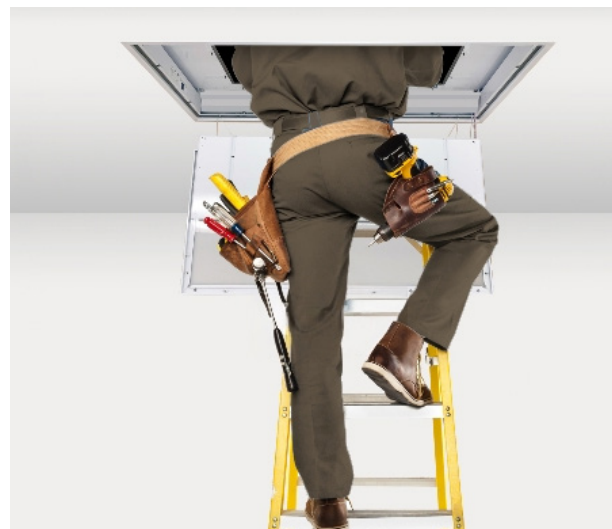

- Easy access
- Less cleanup - back in service quickly
- Located near where you need to work
- lower cost than security access panels
- No added installation labor

Features:

- Heavy Gauge Construction
- Tamper Resistant Hardware
- Polycarbonate Lensing
- Security Ceiling Ready
- Ligature Resistant
- Resists Intentional Abuse

Approvals:

- UL listed to CSA and UL standards for insulated ceilings and wet location
- Certified IP65
- IK10 Rated

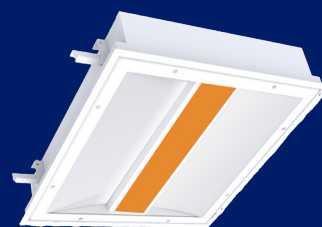

Available sizes: 2x2 | 2x4
