

Viscor luminaires now integrated with BIOS SkyBlue® technology for a healthier future.

Viscor's line of Visioneering and Certolux products integrate BIOS SkyBlue® lighting solutions to offer healthy circadian lighting.

BIOS SkyBlue® is true circadian light. SkyBlue lighting communicates directly with our bodies at the cellular level to regulate our circadian biology, normalizing sleep patterns and improving overall health.

BIOS technology benefits:

- Regulates circadian rhythms for better sleep
- Improves short and long-term health
- Boosts productivity and focus
- Enhances physical, mental and emotional well-being

Suitable for a variety of applications such as offices, boardrooms, retail stores and supermarkets.

Featured BIOS enabled products:

Viscor can integrate this technology into a wide range of Visioneering and Certolux products. For specific configurations, just ask us!
